[Prevalence and predictors of gastroesophageal reflux disease in pregnant women and its effects on quality of life and pregnancy outcomes](#)

Published On: March 30, 2021 | Pages: 008 - 011

Author(s): Dong Seok Lee, Ji Won Kim, Kook Lae Lee and Byeong Gwan Kim

Introduction: Pregnancy is considered a risk factor for Gastroesophageal Reflux (GERD). However, studies on GERD during pregnancy are rare in Korea. We aimed to evaluate the efficacy and clinical outcomes of GERD in late pregnancy in Korea. Methods: Data from a total of 94 pregnant women in the second or third trimester at the SMG-SNU Boramae Medical Center for prena ...

[Anencephaly: Case report and literature review](#)

Published On: March 05, 2021 | Pages: 005 - 007

Author(s): Kamal El Moussaoui*, Sara El Bakkali, Ibrahim Ghrab, Aziz Baidada and Aicha Kharbach

Anencephaly is a lethal fetal neurological malformation. This malformation accounts for 40% of neural tube malformations. The diagnosis is based on the ultrasound of the 1st trimester between the 11th and the 14th weeks of amenorrhea by the discovery of an exencephaly which results in the visualization of the ossification of the cranial box and therefore of the imposs ...
